EXPERIENCE

Rosatom — May 2026 – Present
Design Intern — Moscow, Russia (Remote)

- Designed a browser-based digital twin for monitoring industrial equipment on the go, beyond the control room.
- Developed a sci-fi inspired HUD interface with responsive, orientation-aware layouts from desktop to mobile.
- Architected a modular, configuration-driven platform so new machines map to their sensor tags without redesign.
- Shipped WebGL builds that load in under 7 seconds with per-texture compression and IL2CPP code stripping.

Indian Institute of Technology Jodhpur — July 2025 – Present
Teaching Assistant, Engineering Design — Jodhpur, India

- Mentor and give design feedback to 48 students from 13 engineering disciplines building products in teams.

Siemens — January 2025 – July 2025
Design Intern, FT UX Advanced Experience Research — Bengaluru, India

- Designed scalable UI components for the COMOS Walkinside digital twin, showcased at UX@Siemens Germany.
- Contributed reusable XR interaction patterns proposed for Siemens iX, the company's open-source design system.
- Researched industrial XR heads-up displays and evaluated concepts with stakeholders, refining information hierarchy, placement, interaction behaviour and component visibility.
- Helped build a controlled test environment for a patent-pending VR interaction technique.

Elevar — May 2023 – September 2023
UI/UX Design Intern — Mumbai, India

- Built a token-based Figma design system (colour, spacing, radius) with responsive component variants, and used it to redesign and code a responsive Contact page in HTML/CSS.
- Analysed user behaviour in Google Analytics and Microsoft Clarity to prioritise usability fixes.
